

Atrix International Presents...

# The ATRIX Family of Vacuum Products

# The Atrix Vacuum Family

Whether your needs are large or small, we have the Service Vacuum for your application.

- ✦ **Omega series** — powerful performance.
- ✦ **Express series** — smaller, lighter, compact.
- ✦ **HCTV** — larger capacity for economy.

# The Omega Vacuum Series

- The most widely used, least expensive, ESD safe, 0.3-micron filtration service vacuums in the world.

## ❑ The *Omega Vac*

Best value, ESD safe, 0.3-micron service vac available. Directly crosses the 3M model 497-AJ.

## ❑ The Omega Vac *Supreme*

Adds **sound baffles** for 15% reduction in noise level, and portable shoulder strap.

## ❑ The Omega Supreme *Electronic*

Adds **EMI / RFI in-line filter** for security – won't disrupt sensitive electronics, or test equipment.

## ❑ The Omega Supreme *SLFH*

Adds **HEPA** grade filtration ( 99.97% Efficient @ .3-micron) for Ultra fine particle pickup.

## ❑ The Omega Supreme *SLFH-DB*

Adds **Dissipative Body** for ESD Safe environments, like Clean Room production areas.

## ❑ Custom Colors – Private Label ( Some minimums may apply)

# Safe, Effective and Affordable

*VAC OMEGA -SLFH - Electronic HEPA*

## □ The *DATACOM VAC*

It's the choice for Telecom, Datacom installation crews nation wide. Electrical Contractors, Data Centers, Fiber Optics, Central Office crews, Computer Techs, CATV and HVAC Cleaning Crews prefer this model over more expensive brands. Disposable filter cartridge, and self-storing tools make it easy to use, compact, safe and portable. Adds **HEPA** grade filtration (99.97% Efficient @ .3-micron) for ultra-fine particle pickup. EMI/RFI shielded, ESD safe! 220v available.

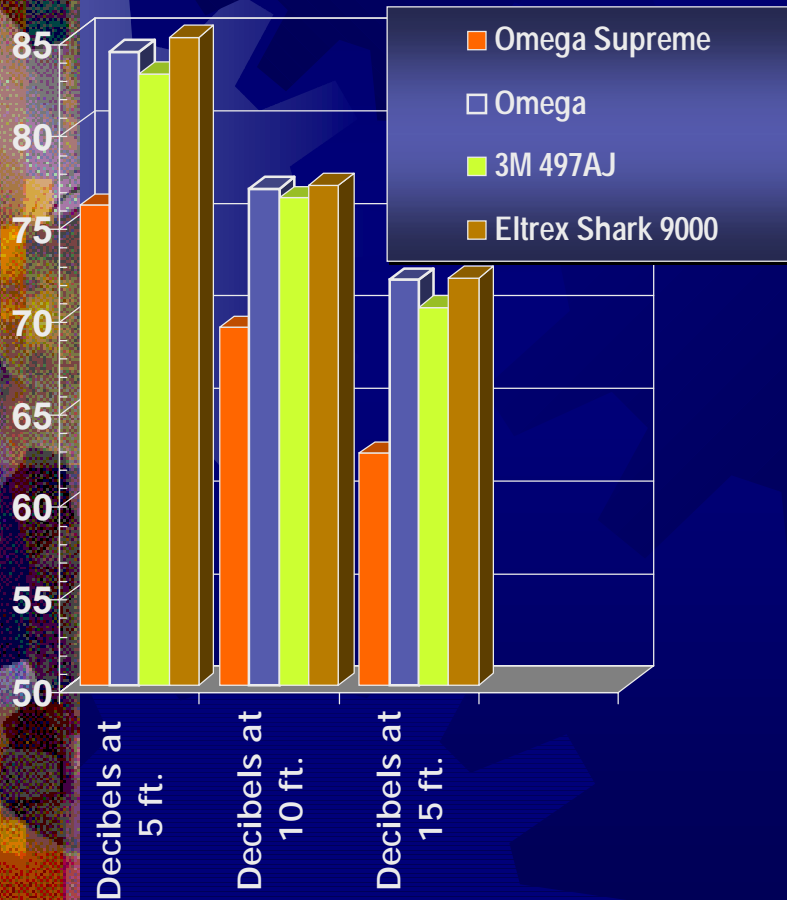

*VAC OMEGASLFH-DB- Dissipative body HEPA.*

## □ The *Clean Room Vac*

Clean Room Clean without the Clean Room Budget. HEPA grade filtration in a small powerful size. ESD Safe, EMI/RFI shielded. The economic choice for class 100K Clean Rooms (class10K with available HEPA exhaust filter attachment) and higher, Clean Room environments. Save thousands over Stainless Steel HEPA Vacs for your manufacturing or production facility. Adds **HEPA** grade filtration (99.97% Efficient @ .3-micron) for the Ultra fine particle pickup, and ESD SAFE static-dissipative ABS plastic body for sensitive ESD Secure Environments.

# Did You Know?

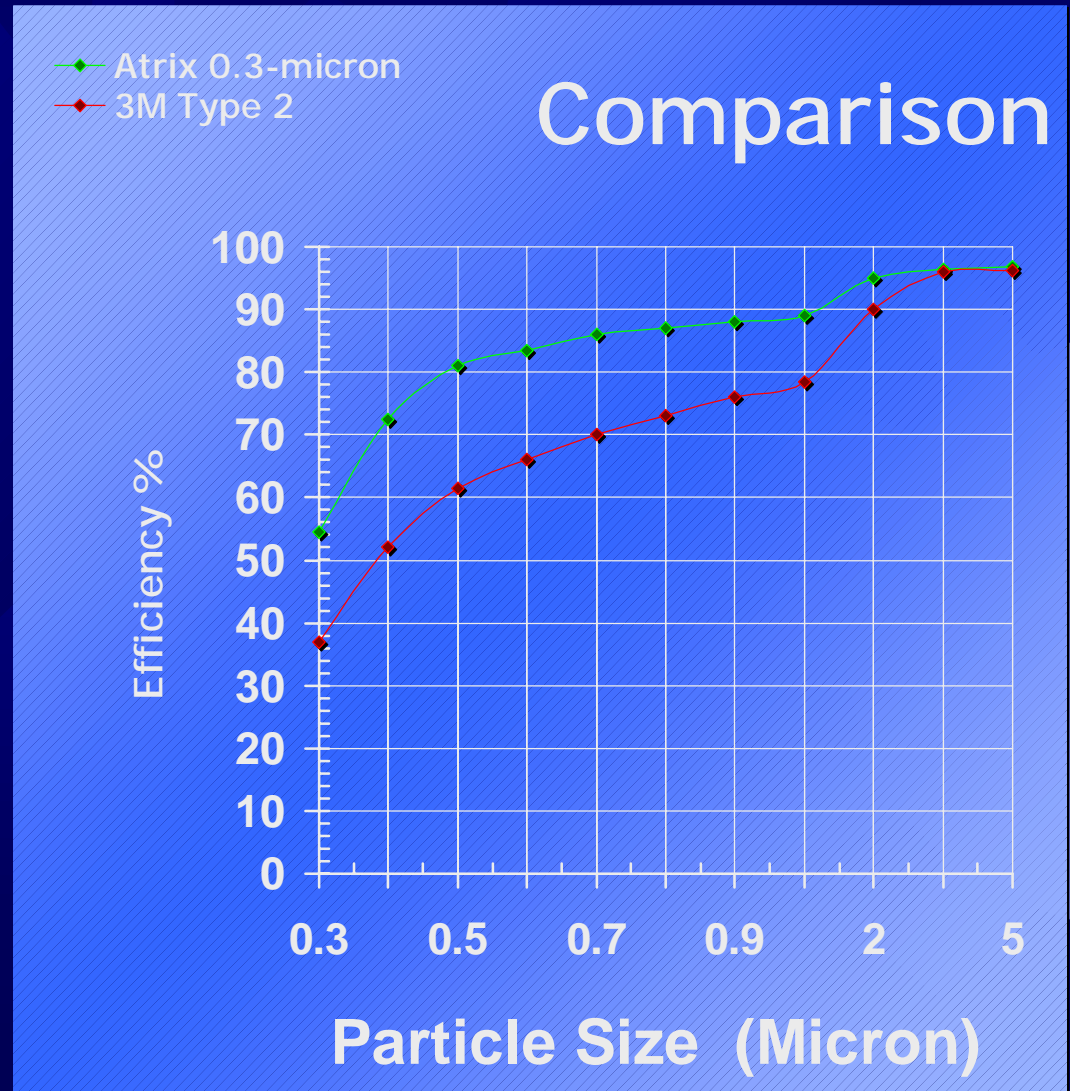

## Atrix Omega Supreme is quieter than the competition.

- ★ Studies have proven the Atrix Omega Supreme is approximately 15% quieter on average in operation than the competition.
- ★ Technicians, OEM's and office personnel around the world request the Omega Supreme as standard equipment for their service work environments.

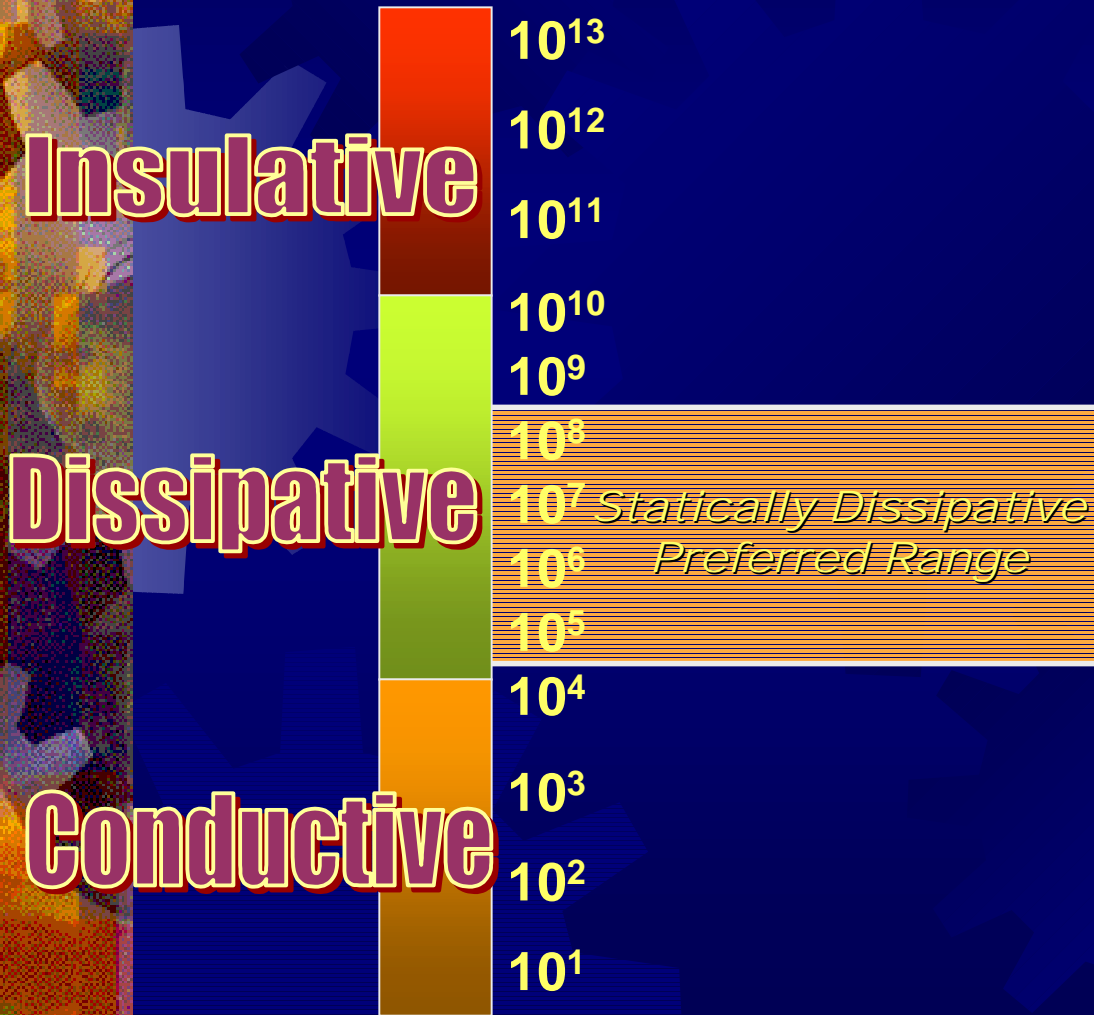

# Did You Know?

□ Studies have proven the Atrix Standard 0.3-micron filter is more efficient than the Standard 3M type 2 filter.

# Did You Know?

Atrix Omega and Omega Supreme are ESD safe from tip to tail.

☀ Testing has proven that Atrix Service Vacuums have a conductive path-to-ground, which wicks away dangerous static electricity that can cause damage to sensitive electronic parts.

☀ We worked with Major Manufacturers to design ESD Safety into our machines to their specifications, from the ground up.

# The Express Lineup

- **No Batteries to re-charge!**

120v Power in a compact size.

- **Powerful and Light to carry**

0.3-micron filter captures ultra-fine particles in disposable cartridge filter.

- **Only 6 lbs. ! 600 watts!**

- The **Office Express** NO BATTERY!

Best value! It's the smallest, lightest, most powerful, dust and dirt vac available. 120v Power in a small package. New carry tote holds lots of extras! Bag and shell style filter. New 75000 series adds new 600 watt motor POWER!

- The **Toner Express**

The Lightest, most powerful fine particle vac. ESD safe hose and utensils. Adds hard plastic filter cartridge for security and convenient disposal. Toner Express is the choice for Field Service Techs, Printer Service, Telecom Installers and Office Personnel who need fast easy cleanups, but don't want to lug a big vac around.

- The **HEPA Express**

HEPA grade filtration in a small powerful size. ESD complete path-to-ground! Safe for electronics, EMI/RFI Filtered. Adds **HEPA** grade filtration 99.97% efficient at .3-micron for Ultra fine particle pickup. Dust, Mold, Lead, Color Toner, Fiberglass and other microscopic biohazards captured in an easy to seal and dispose hard plastic cartridge filter.

# HCTV High Capacity Vacuum

- High Capacity canister filter
- Roller base
- Remote foot switch operation
- Ideal for Service Depots
- Ideal for Contractors

## ❑ The *HCTV VAC* (model HCTV5)

High Capacity Vacuum system. Designed for large volume applications where dry fine particle pickup is a must. The cost effective solution for the user who works with high volumes of fine particle debris For cartridge re-chargers, Service Depots, abatement contractors, shop dust, mechanical clean up or industrial printing. Unique 5 gal. Style canister filter seals quickly for disposal, and holds large quantities of debris.

## ❑ The *HCTV HEPA* (model HCTV5H)

HEPA grade filtration in a large powerful size. Adds *HEPA* (99.97% Efficient @ .3-micron) for Ultra fine particle pickup. Clear 9' hose , ESD safe black hose, Back-Pack type models all are options. (HCTV5L)

❑ **220V models available with either standard 0.3-micron filter or HEPA (99.97% efficient @ 0.3-micron) filters.**

❑ **Private Label available**

# Atrix Filters offer better Performance and better Value.

# ATRIX 31700-THE WORLDS BEST TONER VACUUM FILTER

## Compare Quality

**ATRIX 31700 Filter:**  
Proven to be 32% more efficient than the 3M Standard Filter.

ATRIX Filter .3 Micron Media  
3M Filter .9 Micron Media

**Manufactured with FAIL SAFE LEAK PREVENTION:**  
All 31700 Filters are manufactured with a "Double Overlay" that is glued to prevent any possible leakage.

**Manufactured:**  
in the U.S.A.  
Reground plastic is used to help preserve our environment

**Manufactured with: FAIL SAFE BONDING.**  
All 31700 Filters are assembled with a unique chemical bonding process that bonds the plastic and media together...virtually impossible to separate.

## Compare Experience

Building Filters since 1991

Over 150,000 31700 Filters shipped in 2000 with a return rate of less than 3 out of 10,000!
