Burnsville, MN. Atrix International announced today, 7/12/04. New HEPA and ULPA filtered Cleanroom vacuums filter the exhaust air and exceed cleanroom class 100,000 standards. They are ESD safe and have EMI/RFI suppression.

The Omega Series Cleanroom vacuums come standard with a true HEPA cartridge filter (or optional ULPA cartridge filter), 10' ESD safe hose, 16" ESD safe rubber flexible gooseneck, and power cord to clean sensitive manufacturing equipment, electronics, cabinets, computers, and copy machines. With the standard non-ESD safe 5.5" utility brush, larger areas such as floors, raised floors, and tabletops can be cleaned. In addition, these Cleanroom vacuums are EMI/RFI filtered, so they are perfectly safe to be used in and around electronic equipment. Pricing for Cleanroom vacuum with filter starts at \$368.00.

Optional equipment includes a backpack and an accessory kit. The accessory kit is perfect for large floor areas, ceilings, etc. The kit includes two 20" straight wands, 11" curved neck, 10" rough floor wand, 10" floor wand, and caddy.

Atrix International is a full line manufacturer of fine particulate vacuum products, including HEPA and ULPA filters for the field service, electronics, remediation, and abatement industries. Their vacuums and filters are available worldwide via a network of authorized distributors.
