Burnsville, MN. Atrix International announced today, 12-9-05.

A New High Capacity Vacuum is 40% more powerful than its predecessor. The New Atrix HCV is much quieter and comes with all standard utensils. Additionally, the vacuum has an extended motor life.

The Company is offering two versions of a New Seven Gallon Cartridge filter for the High Capacity Vacuum. The standard filter is made with a .3-micron media that is ideal for extracting toner, soot, drywall dust, and fine powders. It is ideal for the toner recycling industry as well as for print shops and copy centers. The New Seven Gallon Cartridge filter is also available as a true HEPA filter. This filter is ideal for the abatement industry to extract asbestos, lead paint dust, mold spores, and dry chemical spills. Both filters offer 30% increase in capacity over the previous five-gallon filters.

Atrix International is a full line manufacturer of fine particulate vacuum products, including HEPA and ULPA filters, for the field service, electronics, remediation and abatement industries. They produce filtration products that can capture particles as small as .12 micron. Their vacuums and filters are available worldwide via a network of authorized distributors.
