Burnsville, MN. Atrix International announced today, 9-26-03. New Atrix Safety Vacuum featuring a self-contained HEPA (99.97% efficient at .3 micron) filter. The 600 Watt, 6-pound Atrix Safety Vacuum is designed for fast and efficient cleaning. The Atrix Safety Vacuum safely extracts and contains very small particles such as: dry chemical spills, mold spores, lead dust, toner, soot and other ultra-fine particles.

The Atrix Safety Vacuum comes equipped with a powerful 600 Watt motor for fast and efficient cleaning. It also features a true, self-contained HEPA filter to safely store the debris. A clear, see-through hose assures the user that the debris is safely contained within the filter.

There is an optional wall-mount kit for storage and easy accessibility in high-risk areas. Yellow labels are displayed for easy and quick identification.

The Atrix Safety Vacuum has been designed for easy and economical use for hospitals, schools, chemical labs, medical centers, corporate R&D centers, as well as governmental security applications.

Atrix International is a full line manufacturer of fine particulate vacuum products, including HEPA and ULPA filters, for the field service, electronics, remediation and abatement industries. They produce filtration products that can capture particles from .5 micron to as small as .12 micron. Their vacuums and filters are available worldwide via a network of authorized distributors.
