Mighty Mouth Upright Vacuum

Atrix International Introduces New, More Powerful, Dual Motor Upright Vacuum

For Immediate Release August 11, 2005

Burnsville, MN. Atrix International announced today the Mighty Mouth Upright Vacuum. The Mighty Mouth can pick up large objects such as popcorn, pretzels, crackers and even pencils. There are no hoses that can clog and the Mighty Mouth has two powerful motors that provide outstanding deep cleaning power. The front swivel wheels and low weight handle make for easy maneuvering while reducing back fatigue. The Mighty Mouth can also be equipped with a true HEPA Filter bag to capture mold, lead dust, and other harmful debris.

The New Mighty Mouth is designed for commercial uses. It is ideal for hallways, entryways, meeting rooms, cafeterias, and schools. The vacuum comes with a lifetime belt replacement warranty and is extremely easy to service. It is US Made in Burnsville Minnesota.

According to Steve Riedel, President of Atrix International, "The Mighty Mouth Upright Vacuum enhances Atrix's line of Backpack and Canister vacuums. Atrix has a reputation of building reliable vacuums for the electronics, office products, and abatement industries. The addition of the Mighty Mouth to our current product line greatly expands our viability into the Jan/San Industry. We will be showing the Mighty Mouth and the Handy Vac at the ISSA Show in October.

Atrix International is a full line manufacturer of fine particulate vacuum products for the field service, office products, electronic and lead/asbestos abatement industries. They produce filtration products that can capture particles from .5 micron to as small as .12 micron. Their vacuums and filters are available worldwide via a network of authorized distributors.
